HIGH STANDARDS FOR HIGH EXPERIENCES

We are High Standard Technology, a leading vape hardware company in California, USA, offering professional one-stop solutions from concept to delivery.

With a fully owned 60,000-square-foot certified manufacturing facility in China, we hold both a vape production license and ISO 9001 certification to ensure compliance with high quality standards. Our expert team, spanning China, the USA and Canada, is dedicated to R&D, OEM, ODM, and beyond.

At High Standard, we are committed to transforming your ideas from initial concepts into market-ready products with efficiency and precision. Our integrated approach ensures that every stage of product development is handled with utmost professionalism and expertise.

Partner with us to experience a collaborative relationship built on innovation, professionalism, and a shared drive to push the boundaries of what's possible.

ONE-STOP SERVICES

Design

Innovative ID, structure, functionality and packaging design customized to bring your vision to life.

Manufacturing

World-class production in our own certified facility, managed end to end by a senior engineering team to ensure premium quality.

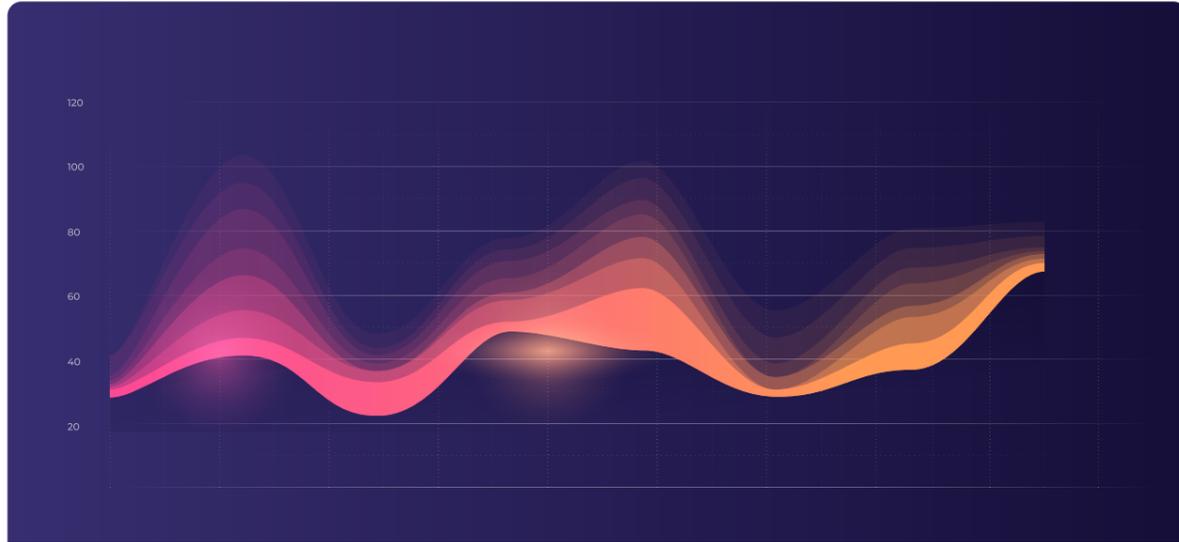

Shipment

Fast and reliable global delivery tailored to your specific requirements.

Services

From project kickoff to long-term success, our dedicated managers provide seamless support and trusted after-sales service.

Wave Tech - The Smart Heating Curve

Smart curve heating releases terpenes at the perfect temperature without burnt taste. Fully customizable temperature curves let brands deliver a unique and flawless flavor experience.

Anti-Counterfeiting Technology

Products equipped with this technology carry a secure chip with a unique ID, authenticated through the UNI-CORE SaaS system. This enables real-time verification, rejects counterfeits, and provides full traceability.

Prevent Auto-Start via Type-C Port

A physical Type-C plug blocks the circuit, preventing accidental activation during shipping, storage, or refilling. It's simple to use: just unplug to start.

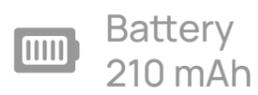

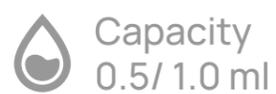

ID Verification – Secure and Seamless

One-time ID and facial verification links securely to the device and brand pod. Guarantees compliance, prevents unauthorized use, and keeps access safe and simple.

GUMMY

HS 051

The new design, as slim and light as a piece of chewing gum, offers an unprecedented gripping comfort. It is compatible with 0.5 ml and 1.0 ml capacity needs and features a preheating function to ensure a smooth experience.

GEM BAR

HS X011

A compact, lightweight device that delivers authentic flavor with every use. The window shape can be flexibly customized to maximize alignment with a brand's aesthetics.
